SKILLS

Languages

Python
SQL

Libraries

Pandas
NumPy
Matplotlib
Seaborn
Scikit-learn

Tools

Git
Power BI
Tableau
Excel

EDUCATION

B.E – CS Engineering (AI & ML)

Sri Venkateswaraa College of Technology
Chennai | Sep 2024 – May 2028 (Expected)
CGPA: 7.6

Higher Secondary (MPC + CS)

Mukkala Nammalwar Chetty
Vivekananda Vidyalaya
Jun 2022 – Mar 2024
Percentage: 71%

AWARDS & CERTS

- Best Student Award – 2023
- Python for Data Science – NPTEL (2025):
Pandas, NumPy, Visualization

PROFESSIONAL SUMMARY

Data Science-oriented Computer Science undergraduate with hands-on experience in machine learning, statistical analysis, and data visualization. Proficient in Python, SQL, and end-to-end ML workflows including data preprocessing, feature engineering, and model evaluation. Experienced in building predictive models and analytical dashboards. Seeking Data Science internship roles to apply data-driven problem solving skills.

PROJECT WORK

Student Performance Dashboard System

Designed and implemented a dashboard system to monitor and analyse student academic performance and attendance, enabling efficient tracking and data-driven decision-making.

- Developed structured data models for student performance tracking
- Built visual dashboard to represent attendance and academic metrics
- Improved data accessibility and reporting through interactive UI components

Python Streamlit Pandas Data Visualization

E-Commerce Sales Prediction System

Built a machine learning-based sales forecasting system using historical e-commerce data to predict future revenue trends and customer demand with an end-to-end data pipeline.

- Implemented Linear Regression and Random Forest regression models for sales prediction
- Evaluated model performance using R² Score and Mean Absolute Error (MAE)
- Visualised trends and predictions using Matplotlib and Seaborn for business insights
